(Aquilegia vulgaris) rare but in town

Aureolella Canadensis, sandy dry ground Trappe Pond. & &c.

(Delphinium azureum) Meadow near the Dove [illegible]

(Chrysanthemum parthenium) Waste ground in town.
Some flower still.

Sept. 15. Pine. In afternoon west of water tower and on across the plains & Great Pond.

Pinus Strobus. A single tree of three trunks united into one near the base, about 30ft high among the field pines perhaps a half mile W. of the water tower. No indications of the ground around having been disturbed any where near by. The locality was an extensive burnt hundreds of acres in extent of pines & scrub oak & white oak &c. The pine cones, were found scattered from 6 to 12 feet, & Pinus sylvestris, the larger cones, & the smaller cones.

Panicum adhaerens, Dry sandy ground out N. across N. W. of the town.

Gymnolobus nigrescens Torr. Dry clayey depression which had earlier been wet, on field W. of the town.

Eriocaulon septangulare Small, Ed. Great Pond.

(Calamagrostis Pickeringii) A single plant found in June on east side of East Pond

(Sparganium androcladum) Edge of Great Pond

Corynephorus canescens (L.) Beauv. Sandy soil near the coast.

Lot 16, Hardly merged with high ground; Cool Calluna pond in afternoon & beyond to east extending into St Pond.

(Sparganium multipedunculatum) Border of low shrubs St Pond east; Lot 16, low land to the Long Pond Pond

(Ceratophyllum demersum) Ed Pond

Eleocharis acicularis, Wd. Marsh pools in low grounds on east of St Pond

Lot 17, Hardly merged with high ground, Cool. Up west side Long Pond to Great Pond in Aug. Calluna pond with Eriocaulon

(Micrampelis lobata, Roadside at edge of town. br.

(Erigeron annuus) field on Oak Bluff, one time 1 mile out of town.

(Silphium terebinthinaceum) one bunch in bog W. of Oak Bluffs road over a mile out by

(Carex sanguinea?) Leaves only of some Carex not before seen upon, [illegible]

Sept 18. Boating back in a.m., in afternoon [illegible] with Edith. Fine day.
Cloudy & threatening rain & wind
Up Acre in the plains to foot of dune on [illegible] back in afternoon to Alice Lewis, Vineyard Haven, & [illegible] expedition tomorrow to look for Beach Heath.
Lespedeza frutescens one bush found on [illegible] Lespedeza acuticarpa near by

Sept 19 Wet, threatening morning, post from my bag for Hon. Cleared later, fine afternoon. Crippen and Leach in Am. West side, in afternoon [illegible] [illegible] to

East side on Cape Sable Bay.

(Liatris pycnostachya.) A solitary specimen & a number of separate clusters of separate plants occupying a few square yards on open place in oak woods on Hypoquiver I. The plants were mixed with Panicularia pycnanthera, the commonest colony of the sort; & many Veronica scutellata, Juncus

(Juncus tenuis, Eleocharis tenuis.) Both of these are there in a similar habit with the above, plants mostly dried. Not found freely

Oct 21. Rainy from 6 A.M. only occasional later & fair rather hot day. Left Camden 9.45 A.M. & 1 P.M. drove through Hanover County & beat the record having for Hanover Ct. House by B.R. and we found fresh tracks in the road about Hanover Court House in a field.

(Solidago rugosa var. asperula.) Open deer ground with oaks on N. Fork road; c. thence towards N. Fork Road

(Polygala grandiflora.) A group of small tufts, a light purple bell flower, in woods on N. Fork road.

Lilium michauxii, a single plant in flower in old field near Gaines Mill Landing

Gaines Mill Landing

(Lepedium densiflorum) A single plant near the Silene noctiflora - nearly dried up

(Linum usitatissimum) A single plant just in flower near the above

(Centaurea cyanus.) + Scattered thinly on old cultivated field at Warden Sawyer's place

(Trifolium incarnatum) + In same field with the above

Solidago lucida + Plenty in rock on road to Tisbury Scotland, Perhaps a half dozen plant scattered among an abundance of S. bicolor - flowers golden yellow - otherwise nothing more than S. bicolor

(Hedeoma pulegioides) A good patch of strong plants, mostly dried up, in a little depression by the roadside on road to N. Tisbury Pond

Gnaphalium purpureum + Scattered among small plants of G. polycephalum in sheep pasture, S. side of N. Tisbury Pond

Panicum latifolium. Rocky ravine
cultivated fields near the North Fork
(Gaultheria procumbens) creeping in shade
Sept. 12. Leaving beach in Bay to Oak Bluffs by water ar-
beach in P.M. 1½ hours on shore.
(Eupatorium maculatum) 4 to 5 ft. Near Pond

Veronicastrum virginicum 4 ft. Scattered
plants in waste ground Oak Bluffs
(Catalpa Catalpa) a few seedlings on the shore
Sept. 13. Leaving beach in afternoon
in afternoon arrive to S.E. side of
Cape Poque Bay.
(Salix discolor) Low shrub in dense
low thickets. Leaves unusually varied & coloring
early petiole, but to be referred to no
other known variety of S. discolor
(Salix alba) Not found here in buggy but common on
Chappaquiddick I.
(Cyperus filiculmis) Found near the beach

Carex digitalis Two plants in dense
deciduous thicket, leaves & sheaths somewhat
pubescent. D. C.

(Osmunda cinnamomea) Near the
thicket. Sept. 14. D. C.

Actaea alba [illegible] and
Rubus [illegible] adjoining thicket [illegible]
[illegible] a dist. with the associated
Rubus, containing [illegible] only plant.

Panicum [illegible] a single
plant, spikelet all fallen, on [illegible]
thicket

Sept. 24 Bluefishing. Nice day; warm calm.
" 25 Nice day. Rapidgrad[illegible] across to
Pouch Pond — drove back — sailing [illegible]
" 26 Trappe Pond & Swamp and Longitude
in Am. On Rappahannock for an hour
in afternoon.

Centaurea Vochinensis ♀ ♂ scattered thro
a thick field of weeds 1 mi. N. of
Trappe Pond. With it much Hedeoma pulegioides
Cirsium vulgare, Erechtites hieracifolia, Lycopus virginicus,
Lobelia inflata. ♀ a bit in more ♂
